Bio-Identical Hormone Optimization Therapy

Bio-Identical Estrogen & Testosterone therapy has been shown to have a significant reduction in Breast Cancer, Osteoporosis & Fallopian Canal Ectopic.

Whether you lose it or not, hormone levels start to decline rapidly beginning around our mid-fifties in early 60s and continue to remain at lower levels for the remainder of our lives. This drop in hormones is natural and unavoidable in many ways, but we can still help control how rapidly or severely this change happens and how we adapt to its effects.

Hormone therapy has been around since the 1950s, with a long history of safe, effective results and shown to improve health and alleviates anxiety methods, including oral, patches, creams and injections.

Benefits of Bio-Identical Hormone Optimization Therapy include:
- Greater Mental Clarity
- Increased libido and interest in sex
- Decreased body fat and increase in muscle tone and mass
- Increased energy levels and alert thinking
- Improved sleep
- Decrease in depression, irritability and mood swings
